## **Dr. Kevin King Joins the Bayside Dental Team**

*New dentist already seeing patients at local dental office.*

ANAHAUC, TEXAS (June 6, 2014) – A new dentist is in town and has joined the team at Chambers Health family. Dr. Kevin King, II, has joined Bayside Dental as a new on-staff dentist. Dr. King is already seeing new patients, offering families a local option for dentistry.

“The addition of Dr. King to our team will help us further support the growing needs of our practice while delivering the kind of care our community expects,” said Kaley Smith, Executive Director to Bayside Clinic & West Chambers Medical Center. “Dr. King’s academic background and knowledge in dental health will greatly benefit our community.”

As the new dentist in town, Dr. King has filled the position left vacant after Janet Grobe Hood, D.D.S. accepted a new opportunity outside of Chambers County. Dr. King will be able to provide the same type of care and education in the area of dental health the community has come to appreciate.

The Charlotte, N.C., native attended the dental surgery program at Meharry Medical College in Nashville, Tenn., where he obtained his doctoral degree. Dr. King’s education is also backed by a bachelor’s degrees in science and biology.

“What I most enjoy about my career is helping my patients understand the importance of preventative dentistry techniques,” Dr. King explained. “From daily brushings and flossing to knowing how to make better food choices, all contribute to oral health.”

Outside of his profession, Dr. King enjoys watching movies, traveling, and eating different types of foods. He explained that Bayside Dental is what brought him to Texas and he’s looking forward to living in the area.

“The patients I’ve already started seeing have been extremely welcoming and have shared with me all of the local hotspots that I must check out,” Dr. King said. “It’s all been exciting and I look forward to making a difference here at Bayside Clinic.”

Dr. King is now seeing patients at Bayside Dental. For more information and to schedule an appointment, please call 409-267-4126.
