13. Would you recommend this facility to your friends and family	0	0	0	20	0	100%		67%	100%	97%

**Survey Data Explained**

Report Generated: 05/29/2014 17:34

This table contains satisfaction survey data calculated by the RPM website. Each row contains data for a survey question. The table has two categories: **Internal Performance** shows the distribution of responses, a Score (either *Weighted Average* or *Loyalty Score*), and a 12-month trend bar chart. **External Comparison** shows the Low and High scores of the hospitals in the peer group, the hospital's score relative to the peer group High and Low scores, and the mean score for other peer group hospitals. **Green** indicates the value is above the peer group mean; **Black** indicates the value is equal to the peer group mean, and **Red** indicates the value is below the peer group mean. **Weighted Average** is calculated by assigning weights to the four different response options (0, 33, 66, 100) and dividing the total number of points by the number of surveys processed (excluding blank/missing responses). **Loyalty Score** is calculated by dividing the count of "Very Good/Definitely Yes/Always/Yes" responses by the total number of surveys processed (excluding blank/missing responses)
